The best guest!

TEACHER NOTES · GATEWAY B2 · UNIT 4

Source: Gateway to the World B2, Student's Book p.53, Developing writing.
Outcome: students co-author and revise a persuasive school-magazine article using a four-paragraph plan and reader-involvement techniques.

45–55 minutes: choose guest and assign roles (5); notice techniques using the SB model (7); oral planning (8); shared drafting (15–20); peer editing and class vote (10–15).

The 180–220 word target is a classroom addition, not a word limit stated on this SB page. Paragraph map in the book: A introduction, B reasons, C visit activities, D conclusion plus further justification. The new page paraphrases the task and adds scaffolding; the model remains in the book.

Open the HTML with its assets and img folders alongside it. Internet is required for Firebase collaboration. Each group uses a different room; all devices in one group use the identical room link. Planning notes and checklist are device-local. Shared paragraphs use the existing ANGLE Firebase component; students edit their own contributions and see the other paragraphs. Add paragraphs in A–D order. Use a new room per lesson to preserve earlier writing.

For teacher mode append &teacher= followed by teacherKey from assets/collab-config.js to a URL that already contains ?room=your-room. Do not distribute the teacher link to students. The teacher can switch modes and collect the final text.

This local material has not been published. To use across devices, host the complete folder at one address, then distribute its room link. Do not email a lone HTML file: it needs its adjacent assets.
